## **FINDING AND RECOMMENDATION(S)**

**Submitted by:** Defensible Space/Best Management Practices Working Group

**Finding:**

The prescriptions for defensible space and the prescriptions for erosion control Best Management Practices (BMPs) have not been consistent in the past. These inconsistencies have lead to confusion among homeowners trying to meet both objectives.

**Recommendation 1:**

Assemble experts in defensible space, fire behavior and erosion control to form a working group to address the inconsistencies and produce solutions to integrate defensible space and BMPs.
